Good Manufacturing Practices

Are you looking for alternative
ways to implement Good
Manufacturing Practices?

Soper's has the Solution.

www.empire-tech.net

Are you implementing Good Manufacturing Practices?

Good Manufacturing Practices are guidelines that apply to the Pharmaceutical and Food Industries.

When you are establishing or fine tuning your quality program and manufacturing process, let Soper's Engineered Fabric Solutions provide you with a flexible SoftWall Solution to fulfill your GMP requirements.

Food Industry

The food industry faces challenges with cross-contamination between multiple food products or ingredients. Soper's solves this problem with a food-grade SoftWall Partition. Soper's SoftWall Partitions can also be used to separate food processing and packaging areas from your warehousing operations.

Pharmaceutical Industry

The pharmaceutical industry requires sterile, germ-free conditions. Soper's SoftWall Enclosures range from non-spec'd Environmental Rooms with air delivered for class 1,000, 10,000 or 100,000 standards, to suspended partitions that segregate mechanical and production areas.

SOPER'S FLEXIBLE

Traditional rigid wall construction is difficult to modify or move. Soper's SoftWall Partitions and Enclosures are easily disassembled and reinstalled or reconfigured elsewhere to accommodate new requirements.

SOPER'S AFFORDABLE

Traditional rigid wall construction can cost anywhere from \$8 to \$35 per square foot. Soper's SoftWall Systems are more cost-effective than traditional rigid wall construction, leaving extra money in the budget.

- Installed by in-house crews or subcontractors
- Installation takes hours or days, versus weeks or months
- No facility shutdown required
- Realize measurable time savings
- Simplified curbing requirements
- Minimize connection points that harbor bacteria growth
- Easy to maintain and quick to repair
- Simple to reconfigure, relocate or remove

Fumes / Odor

SOPER'S SIMPLE

Soper's is a leading source of creative ideas (and third party referrals) as you look for options to efficiently and effectively meet the GMP principles that affect your specific manufacturing processes.

In the 1980s Soper's moved from simple standard curtains to Custom Industrial and Architectural Solutions. We lead in advancing the integrity of SoftWall Curtain Partitions and Enclosure Solutions.

We are a member of IFAI (Industrial Fabrics Association International) and continue to work with leading North American suppliers and testing laboratories, to meet more advanced specifications.

For more information about Softwall Partitions and Enclosures, please contact us at (585) 924-8980 or by email sales@empire-tech.net

SoftWall Partitions and Enclosures

We customize each Soper's Solution to meet your specific application.

Whether it is a production floor, food processing lab, or warehouse/distribution center, there is always a need to enclose, segregate or add a work area, without compromising work-flow.

Bring us your challenge and we will work with you to satisfy the requirements of your specific regulatory inspectors (e.g. FDA, CFIA, Insurance Underwriter, local building inspector).

We provide immediate local support through our North American Distributor Network:

- Air Quality Distributors
- Material Handling Distributors
- Regional Factory Representatives

Applications:

- Dividing an entire facility
- Enclosing temperature-sensitive environments
- Separating shipping/receiving from manufacturing
- Sectioning off different product categories or work processes
- Establishing quarantine areas
- Creating clean environments

Benefits:

- Reduce dust, fumes, and noise to create a healthier, safer, more productive work environment
- Prevent cross-contamination between different product categories and reduce inventory spoilage
- Control temperature and humidity; reduce energy consumption and costs
- Economical; typically less than the cost of traditional rigid walls

Features:

- Custom-designed to meet your specific application
- Tie in to existing walls and upper structure
- Manufactured of durable Vinyl Coated Polyester (VCP)
- Include Clearflex strip curtain doors or retractable curtains for easy access, as well as clear PVC windows
- Flame, chemical, and mildew resistant
- Flammability: NFPA 701, Class 1 re ASTM E 84
- Environmental room air quality: class 100,000 / 10,000 / 1,000
- Anti-Static and Anti-Microbial Fabrics
- Dielectric welded seams
- Stainless steel installation hardware
- Letters of Acceptance for Use from Canadian Food Inspection Agency
