

SoftWall Enclosures

Work Stations | Grinding Booths | Assembly Areas | Blackout Inspection Booths

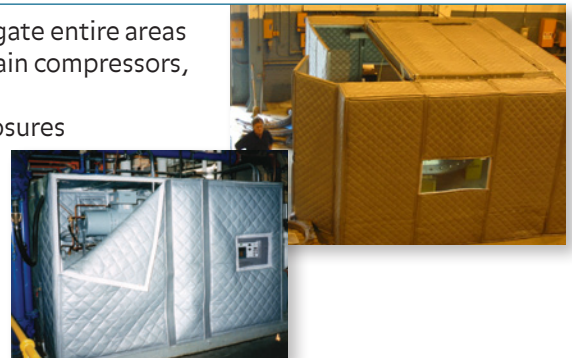

- Control dust, fumes and overspray
- Modular frame design
- Pre-drilled/Thru-bolt assembly
- Options include:
 - Crane cable slots
 - Lighting
 - Third party air filtration modules

Noise Control Enclosures

- Large enclosures to segregate entire areas
- Sealed enclosures to contain compressors, pumps, etc.
- Smaller work station enclosures

Retractable Enclosures

- Accordion-style enclosures retract to a fraction of extended size
- Free up valuable floor space
- Set large, heavy piece-parts in place with overhead crane
- Operate without track hardware on the floor

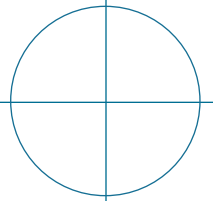

Environmental Work Stations | Clean Tunnels

- Environmental rooms to "spec'd" clean room classifications
- Create positive air pressure environments
- Paint rooms, packaging booths, assembly stations, controlled processes
- Ideal for use in food, pharmaceutical, automotive, and military sectors

SoftWall Partitions

In-plant / Warehouse Partitions

- Separate warehouse and manufacturing
- Segregate inventory
- Create temperature controlled areas
- Temporarily subdivide and sublet facility
- Install SoftWall panels (as shown in picture) between two rows of racking
- Optional door and clear-view windows

Noise Control Partitions

- Sound absorption and sound barrier partition systems
- Options include: Clear barrier panels and material handling strip doors

Environmental Rooms

- Flexible partition systems to create environmental clean rooms

Hybrid (Softwall-Rigid Wall) Partitions

- Tie-in rigid walls and in-plant office walls to the roof deck with SoftWall panels
- Lower high-wall construction costs
- Reduce the cost of suspending ceilings

Enclose Mezzanine Areas

- Control the space above and below existing mezzanine structures
- Clean environments
- Noise and temperature control options

Retractable Options
